

Energy efficiency - is it ever going to happen?

UKWEC Workshop, 7 October 2010, 11.00 – 14.00

Venue: CMS Cameron McKenna (CMCK), Mitre House, 160 Aldersgate Street, London EC1A 4DD

Using energy more efficiently is a cost effective way of cutting carbon dioxide emissions. It can also improve productivity and can contribute to the security of our energy supplies by reducing our reliance on imported energyImproving the energy efficiency of homes can also reduce energy bills and help ensure that the most vulnerable can afford to heat their homes." *HMG White Paper on Energy, May 2007.*

So why is there so much room to improve? Why does waste remain stubbornly high? There has been so much encouragement and exhortation. But barriers remain. Various initiatives are taken, but progress seems slow. Will it ever happen?

Meeting starts at **11am** (Tea and coffee available from 10.30)

SPEAKERS

Gregory Barker MP, Minister of State for Energy and Climate Change, DECC (invited)

John Miles, Group Board Director, Global Chairman of Energy, ARUP

Sara Vaughan, Director of Regulation and Energy Policy, E.ON UK

12.30 Panel Q&A

13.00 Buffet Lunch

14.00 Close of the meeting

Name **Position**

Organisation

t: **e:**

UKWEC Members – Free

EI Members (but non-WEC members) - £30 Non-Members - £50

Cheques payable to **Energy Institute**

Credit card details – (Number; expiry date; valid from date; and 3 or 4 digit security code):

To reserve a place please complete and return this form, or email the same details, to:
