Subject: HYDROGEN GLOBAL – Letter of Voluntary Commitment

Dear Secretary General,

I am pleased to confirm that the Austrian Institute of Technology (AIT) supports the Hydrogen Global Charter. Whilst we understand that **this charter is not legally binding**, we champion this effort. It is critically important for the business community, policy makers, innovators and investors to understand the importance of supply diversity in our pursuit toward mitigating the negative impacts of climate change notably through hydrogen.

AIT will make a clear statement of this commitment to its stakeholders and the general public.

AIT is heavily involved in the transition towards a 100% sustainable energy system and has committed significant resources for the implementation of hydrogen in the Austrian energy landscape. AIT aims to provide its stakeholders with cutting-edge technology to increase the share of hydrogen in the Austrian energy mix.

We commit to annually submitting our progress towards enabling and consuming low carbon hydrogen to the World Energy Council.

Together we can work to enable a better, faster and successful energy transitions.

Kind regards,

Wolfgang Hribernik
Prokurist (AIT)

Dr. Wolfgang Hribernik
Head of Center for Energy
AIT Austrian Institute of Technology
