

The Lebanon Grand
Energy Event 2025

THE QUANDARY OF A RISING SUN:

Working Today, Preparing Tomorrow

24 to 26 September 2025

Metropolitan Palace Hotel | Sin El Fil |
Beirut, Lebanon

The Lebanon Grand Energy Event 2025

The World as we know today stands at a crossroad: fighting climate change while ensuring economic development; accelerating the green energy transition while still considering oil and gas as valuable national resources; pushing development agendas forward while investing in smart and innovative solutions. Swinging between extremes, the World today stands in a quandary.

As the clock is ticking on the irreversible impacts of climate change and the heavy economic burdens of reliance on fossil fuels, hope in the capacity and capabilities of societies to avoid this doomed destiny surfaces constantly. The rapid development of sustainable energy projects all over the world coupled with the implementation of new technologies and innovations mark an increasingly-interesting path towards a better future, though not fast enough. The Sun, as a source of renewable energy and a source of global warming, puts the World at a stiffer quandary.

Amidst this global and regional context, the Lebanon Grand Energy Event 2025 emerges as a main platform in the Arab World with the theme ***“The Quandary of a Rising Sun: Working Today, Preparing Tomorrow”***. In the hopes of applying a sustainable energy approach in Lebanon, the Lebanon Grand Energy Event 2025 relies on outstanding successful experiences from the region to build similar cases in our country. The event will also present an entry point for Lebanese businesses to the neighboring markets.

Gathering energy leaders from Lebanon, the Arab countries and other parts of the world, the Lebanon Grand Energy Event 2025 addresses the current projects and initiatives to promote a cleaner future, while at the same time discussing plans and strategies to address the world of tomorrow.

JOIN US!

This Lebanon Grand Energy Event aims at strengthening the dynamics of sustainable energy development, fighting climate change, and ensuring economic growth. Energy leaders are invited to join efforts during three days to contribute to advancing green energy transition projects. Only committed leaders working today and preparing tomorrow could make a difference.

Energy is definitely a main existential challenge for countries, societies, and communities and the risks associated with fluctuating energy prices and energy availability and volatility have increased exponentially, threatening national economies and the wellbeing of people. Countries could do a lot working independently; however, the real impact could be multiplied significantly by implementing regional initiatives and programs. A faster and more efficient momentum is what the world needs today, and the Lebanon Grand Energy Event 2025 strives to make this happen. **Join us!**

THE ENERGY EVENT

At the dawn of a new future for Lebanon, **Lebanon Grand Energy Event 2025** is expected to gather around 700 delegates from more than 40 countries. The event will spread over a period of 3 days in the capital city of Beirut.

Including a 3-day conference agenda and an “salon space” for meetings and interactions, the Lebanon Grand Energy Event 2025 is the main flagship event of the Lebanon Committee of the World Energy Council (WEC). The Lebanon Grand Energy Event 2025 is organized with the support of the Lebanese Center for Energy Conservation (LCEC).

The Lebanon Grand Energy Event 2025 is one of the most reputable and professional energy events in the Middle East, an event specifically dedicated to the grand energy transition.

Touching on all subjects from renewable energy and energy efficiency to natural gas and green hydrogen, the Lebanon Grand Energy Event 2025 gathers proactive energy leaders focused and determined to find reliable and long-term solutions. It will be a platform for companies and entities to showcase successes and innovations as part of the accompanying exhibition space.

As Lebanon is one main part of the Arab World, the country must strive to play a pivotal role by contributing to the regional and international momenta towards well-coordinated energy systems, building on values of prosperity, progress, and most importantly peace.

Organized by:

The Lebanon Committee of the
World Energy Council

ENERGY
COUNCIL** | **LEBANON**

The Lebanon Grand Energy Event 2025

In full harmony with the year's theme "The Quandary of a Rising Sun: Working Today, Preparing Tomorrow", most sessions of the Lebanon Grand Energy Event 2025 will be dedicated to the current initiatives and projects working today, and the planned actions planned for tomorrow.

THE PROGRAM

The event will gather leaders and decision makers from both the public and private sectors to discuss issues and themes related to electricity interconnections, natural gas pipelines, and green hydrogen ships and carriers. The event will also investigate initiatives and solutions to integrate Lebanon in regional cooperation with many Arab countries and also with Cyprus, Greece, and beyond. As countries can no longer act as solo players, the Lebanon Grand Energy Event 2025 is the place to contemplate successful endeavors.

Various policy measures could help sustain and impact a growing sustainable energy market. Among the initiatives currently under consideration and implementation, the introduction of Energy Attributes Certificates (EACs), such as IRECs, stands out as a pivotal step.

Furthermore, green hydrogen is gaining more and more its reputation as an asset that gains value with more integration. The event will be a place to take the lead in pushing green hydrogen agendas to the next level.

Solar energy, specifically photovoltaic systems, has become a major game changer in Lebanon as well as in other countries. Whether solar systems are to be connected to national grids or supplied with storage, a race to better efficiencies and robust quality is still on its way.

In addition, Lebanon Grand Energy Event 2025 will be featuring interesting presentations, round table discussions, virtual site visits and sharing case studies with the aim to elaborate action plans, projects, and programs and work for a prosperous future for Lebanon and the entire region. It is delicately curated to deliver an immersive learning and networking experience through a series of rich content, deep insights and virtual engagement tools. The event will also cover a large number of emerging subjects in Lebanon and the region, including solar energy, wind, energy efficiency, heat pumps, and most importantly financing.

REGISTRATION

Become a Delegate and benefit from:

- All plenary and technical sessions
- Lunch and coffee breaks
- Exhibition
- Opening and closing ceremonies

Delegate fees do not include:

- Visa related costs
- Flights and accomodation
- Airport transfers
