ENERGY IN MOTION

FACILITATING, EXPEDITING, EXPANDING

9 TO 11 SEPTEMBER 2026
INTERCONTINENTAL PHOENICIA BEIRUT
BEIRUT, LEBANON

INTRODUCTORY BROCHURE

A PIVOTAL EVENT IN TIMES OF ENERGY CHALLENGES

For decades now, energy has been at the forefront of world leaders' concerns. Today more than ever, the impact of energy on societies and development is getting clearer. Countries work on fighting climate change while ensuring economic development; accelerating the green energy transition while still considering oil and gas as valuable national resources; pushing development agendas forward while investing in smart and innovative solutions.

With the Arab World in general and Lebanon in specific being no exceptions, the irreversible impacts of climate change and the heavy economic burdens of reliance on fossil fuels strike national economies. Hope in the capacity and capabilities of societies to avoid this doomed destiny surfaces constantly. A rapid development of sustainable energy projects all over the world, coupled with the implementation of new technologies and innovations, marks an increasingly interesting path towards a better future. Energy issues have been fluid and changing; energy is in a visibly big motion. At the Lebanon Grand Energy Event 2026, energy in motion means facilitating, expediting, and expanding energy projects all over Lebanon and across the Arab World.

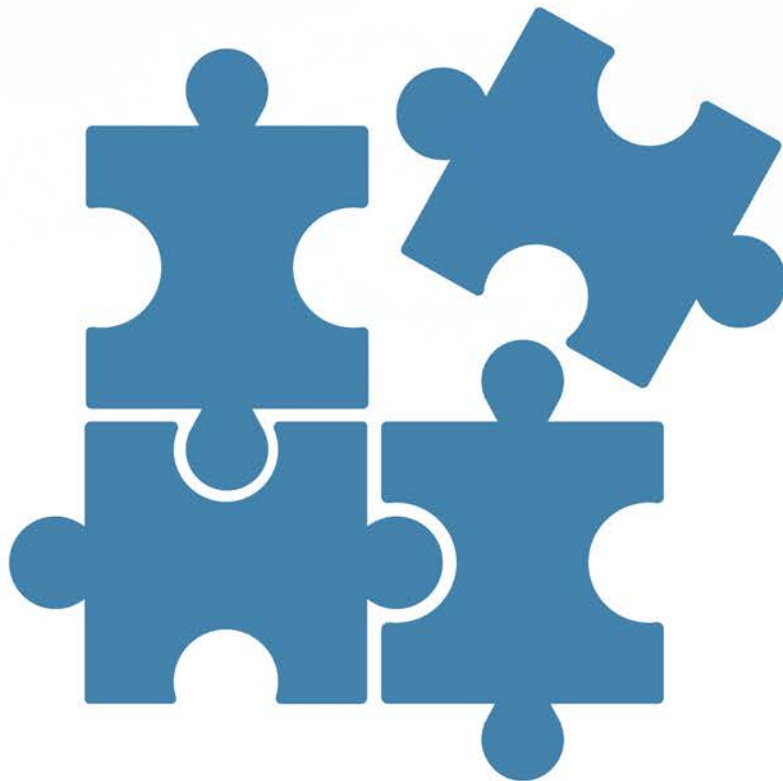

The **Lebanon Grand Energy Event 2026** emerges as a main platform in the Arab World with the theme ***“Energy in Motion: Facilitating, Expediting, Expanding.”*** The Lebanon Grand Energy Event 2026 relies on outstanding successful experiences from the region to build similar cases in our country. The event will also present an entry point for Lebanese businesses to the neighboring markets and further away to Europe.

Gathering energy leaders from Lebanon, the Arab countries and other parts of the world, the Lebanon Grand Energy Event 2026 addresses the current projects and initiatives to promote a cleaner future, while at the same time discussing plans and strategies to address the world of tomorrow.

This Lebanon Grand Energy Event aims at strengthening the dynamics of sustainable energy development, fighting climate change, and ensuring economic growth. Energy leaders are invited to join efforts during three days to contribute to advancing green energy transition projects. Only committed leaders working today and preparing tomorrow could make a difference.

Join us for a faster and more efficient momentum.

Organized by:
The Lebanon Committee of
the World Energy Council

ENERGY
COUNCIL** | LEBANON

THE EVENT

Since 2010, the energy community in Lebanon and from the surrounding regions has gathered during the month of September to discuss the latest energy trends and challenges, and most importantly, to come up with tangible solutions and initiatives for the sector. In 2026, the Lebanon Grand Energy Event continues this legacy, building on years of experience, successes, and worldwide expertise. The Lebanon Grand Energy Event 2026 aims to gather around **2,000 attendees**, with around **500 registered delegates** from more than **40 countries**.

The Lebanon Grand Energy Event 2026 is one of the most reputable and professional energy events in the Middle East, an event specifically dedicated to the grand energy transition.

Over three days, the Lebanon Grand Energy Event 2026 aims to create a vibrant and productive platform for energy leaders from Lebanon and the visiting countries to embark on a real journey towards achieving actual objectives. In fact, the Lebanon Grand Energy Event 2026 is much more than a 3-day gathering; it is a journey spanning over the year and culminating during those three days in the capital city, Beirut.

The Lebanon Grand Energy Event 2026 will include a conference agenda with multiple parallel sessions, an exhibition area for meetings and interactions, a media sphere, a scientific and technical conference, and a gala dinner.

The Lebanon Grand Energy Event 2026 is the main flagship event of the Lebanon Committee of the World Energy Council (WEC). The Lebanon Grand Energy Event 2026 is organized with the support of the Lebanese Center for Energy Conservation (LCEC).

Touching on all subjects from renewable energy and energy efficiency to natural gas and green hydrogen, the Lebanon Grand Energy Event 2026 gathers proactive energy leaders focused and determined to have a long-lasting impact. It will be a platform for companies and entities to showcase successes and innovations as part of the accompanying exhibition space.

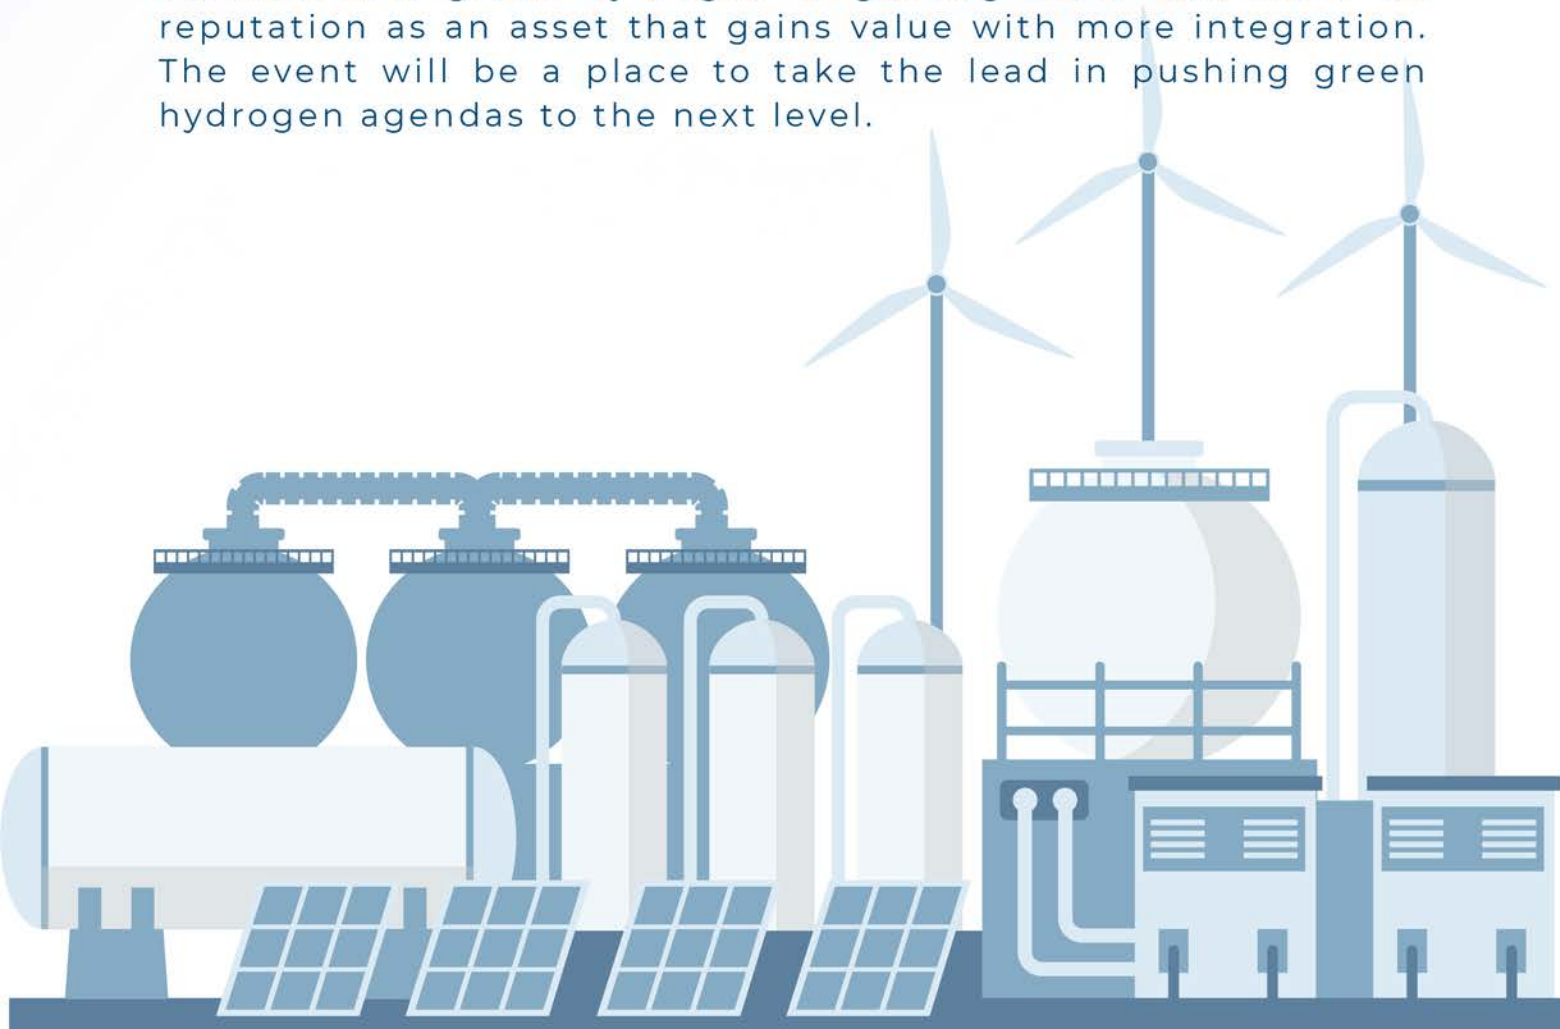

THE CONFERENCE PROGRAM

The Lebanon Grand Energy Event 2026 indulges into all the main hot topics that keep energy leaders awake at night. Most sessions of the Lebanon Grand Energy Event 2026 will be dedicated to the current initiatives and projects taking place in Lebanon and the planned actions for the near future.

The event will gather leaders and decision makers from both the public and private sectors to discuss issues and themes related to electricity interconnections, natural gas pipelines, and green hydrogen ships and carriers. The event will also investigate initiatives and solutions to integrate Lebanon in regional cooperation with many Arab countries and also with Cyprus, Greece, and beyond.

The Lebanon Grand Energy Event 2026 covers various policy measures could help sustain and impact a growing sustainable energy market. Among the initiatives currently under consideration and implementation, the introduction of Energy Attributes Certificates (EACs), such as IRECs, stands out as a pivotal step.

Furthermore, green hydrogen is gaining more and more its reputation as an asset that gains value with more integration. The event will be a place to take the lead in pushing green hydrogen agendas to the next level.

The Lebanon Grand Energy Event 2026 will be a platform to exchange know-how and success stories between Lebanon and the Arab World. The country must strive to play a pivotal role by contributing to the regional and international momenta towards well-coordinated energy systems, building on values of prosperity, progress, and most importantly, peace.

Solar energy, specifically photovoltaic systems, has become a major game-changer in Lebanon as well as in other countries. Whether solar systems are to be connected to national grids or supplied with storage, a race to better efficiencies and robust quality is still on its way.

In addition, Lebanon Grand Energy Event 2026 will be featuring interesting presentations, round table discussions, virtual site visits, and sharing case studies with the aim to elaborate action plans, projects, and programs and work for a prosperous future for Lebanon and the entire region. It is delicately curated to deliver an immersive learning and networking experience through a series of rich content, deep insights, and virtual engagement tools. The event will also cover a large number of emerging subjects in Lebanon and the region, including solar energy, wind, energy efficiency, heat pumps, and most importantly, financing.

With the support of:

The Lebanese Center for Energy Conservation

A WIDE AUDIENCE, A WIDER IMPACT

The Exhibition Space

Over three days, from Wednesday, 9 September to Friday, 11 September 2026, the Lebanon Grand Energy Event 2026 will include a salon exhibition space gathering the leading companies in the sustainable energy field. The exhibition area will be also a platform for energy specialists, university students, and experts to meet with the leading entities and organizations in the sustainable energy sector.

The Scientific Program

Despite the fact that the Lebanon Grand Energy Event 2026 is a professional business event, there is an increasing appetite to focus on the latest trends and discoveries in the sustainable energy sector. A scientific program will be integrated in the Lebanon Grand Energy Event 2026, gathering researchers, students, and university professors. This platform will be an excellent bridge to link the educational world to the business world.

The Media Sphere

A dedicated part of the Lebanon Grand Energy Event 2026 will be led by media partners, working on the transfer of the discussions, projects, and initiatives to the wider public. Media partners will include television channels, newspapers, and websites in three languages: Arabic, French, and English.

The Gala Dinner

The Lebanon Grand Energy Event 2026 will feature a gala dinner, planned on Thursday, 10 September 2026. The Lebanon Grand Energy Event 2026 gala dinner is worthy of the name. A few surprises will be announced later. Not to be missed.

And more.

THE VENUE

InterContinental Phoenicia Beirut

Set along Beirut's Corniche overlooking the Mediterranean, the InterContinental Phoenicia Beirut will host the **Lebanon Grand Energy Event 2026**, offering a prestigious setting where energy, heritage, and innovation converge.

A landmark of Lebanese resilience and renewal, the InterContinental Phoenicia provides state-of-the-art facilities ideal for high-level discussions shaping the region's sustainable energy future. Its central location, world-class hospitality, and elegant conference spaces make it the perfect venue for fostering partnerships and advancing the dialogue on energy transition.

In 2026, Phoenicia will once again illuminate **Beirut** as a hub of collaboration, innovation, and progress toward a cleaner, brighter tomorrow.
