DIGITAL SUMMIT

WORLD ENERGY LEADERS' SUMMIT

Emerging from a crisis stronger and faster together

An invitation to our CEO and Ministerial community

The dramatic impact of the COVID-19 crisis across all sectors, regions and society is resulting in the largest capital reallocation ever seen. The global energy sector is one of the most severely affected. Businesses and governments around the world are facing unprecedented challenges in developing recovery plans to grapple with a global health emergency and progress successful energy transition.

The Secretary General of the World Energy Council warmly invites you to a private and informal dialogue for Ministers and CEOs to engage and exchange with peers on the impacts of crisis and recovery plans, and to take part in a live solutions-finding discussion at a time which calls for an exceptional leadership response.

The experience

In this live digital edition of the World Energy Leaders' Summit, you will take part in an exciting scenarios-based investment and policy discussion, equipping you with the tools necessary to consider and identify the pathways and choices to recovery. The goal is not to map out a plan that is best for all, but to involve you in an exciting exchange of new strategic thinking on the policy choices and investment options to achieve recovery and progress successful global energy transition.

In this facilitated discussion, you and your peers will adopt one of a number of important roles within the

global energy ecosystem and explore post pandemic pathways together in a live simulation. How will you and your peers assess the factors, choices and the range of investment options built into recovery plans? How will you choose to spend your finite resources to achieve sustainable recovery? How will the actions of others impact your decisions?

This discussion will offer an insight into how decisions that you could make today might shape the post-pandemic future and impact the pace and direction of global energy transition.

WHICH FUTURE WILL YOU BUILD?

About the World Energy Leaders' Summit

The World Energy Leaders' Summit is a private, convened space that brings together the Council's CEO and Ministerial community in an informal and interactive peer-to-peer gathering for collaborative sharing. Summits provide an exceptional leadership networking opportunity and facilitate deep understanding and an exchange of strategic thinking on energy transition challenges. Participation is at the invitation of the World Energy Council Secretary General.

There are no speeches, presentations, commitments or communiqués made at the Summit. As a private dialogue and safe space for exchange, all discussions are off the record unless otherwise agreed and no media are permitted.

How to participate

We kindly ask you to note that whilst participation is complimentary, the Summit is a private, invitation-only forum and, as such, invites are non-transferable.

On confirmation of your participation, you will receive details on how to digitally access the Summit and any briefings that will assist you in making the most of the discussion. Up to two senior Ministerial or CEO advisors will be permitted to support participants in room, at the Council's discretion. Please [contact us](#) for further details. If you are interested in attending and have not received an invitation, please contact the Global Agenda team of the World Energy Council.

Digital requirements / connectivity

The World Energy Leaders' Summit will take place using digital platforms. We recommend you have reliable internet connectivity and use a computer to access the Summit to ensure a full experience. Your priority access link will be sent to you on confirmation of your participation. You (or your advisor) will be invited to a short digital meeting in advance of the Summit to introduce you to the platform and how the discussion will be facilitated.

World Energy Week LIVE – Connecting Energy Societies

The World Energy Leaders' Summit takes place as part of World Energy Week, the Council's largest annual gathering dedicated to global energy matters. The digital event brings together our entire energy+ community to address whole energy systems' challenges and opportunities, drive practical action and help shape the future of energy. For more information about the World Energy Week LIVE, please visit the [World Energy Council website](#).
